

AJ Chemical, LLC
 377 Old South Road
 Duncan, SC 29334

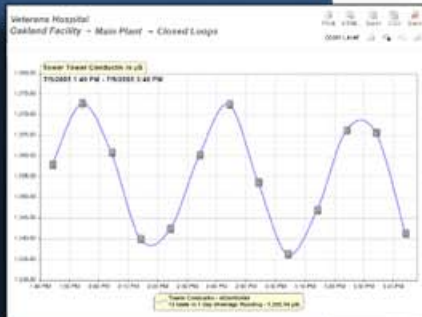

AJ Chemical Reports

Data Logging and Communications
 Designed for System Owners, Operators, and Service Reps

Inventory Reporting and Product Ordering:

- Inventory reporting based on eController tank levels or manual entry
- Online product ordering with multiple recipients
- Graphical representation of inventory levels and usage displayed in user-selectable tank images

eController Compatibility:

- Configure **eController** to sample up to 144 data points per day to insure detailed and accurate results.
- Graph and trend **eController** data recordings.
- Configure **eController** to send inventory levels and test results directly to eServiceReport up to 48 times a day.
- Compare **eController** data logs with Service Report and Operator Log tests.
